# Center for Health Workforce Studies

- Based at the School of Public Health at the University at Albany, SUNY
- Not-for-profit academic research center
- Mission: To provide timely, accurate data and conduct policy-relevant research about the health workforce
- Goal: To inform public policies, the health and education sectors, and the public
- Center was founded in July, 1996

### Background

- Previously it has been found that female physicians earn less than male physicians
- Are gender differences in physician income increasing or decreasing over time?
- New York Resident Exit Survey

#### GME in the U.S. and New York

- In the US there are almost 10,000 programs and more than 120,000 residents
- In New York there are more than 1,100 programs and almost 16,000 residents
  - 12% of all programs and 13% of all residents in the US are in New York
- California trains the 2nd highest number of physicians
  - Almost 11,000 annually (or about 5,000 fewer than New York)

# The New York Resident Exit Survey

- Conducted annually since 1998 (except for 2004 and 2006)
- A survey of all residents and fellows completing training in New York (approximately 5,000 annually)
- Substantial support and assistance from GME directors and programs directors
- Average annual response rate greater than 60%

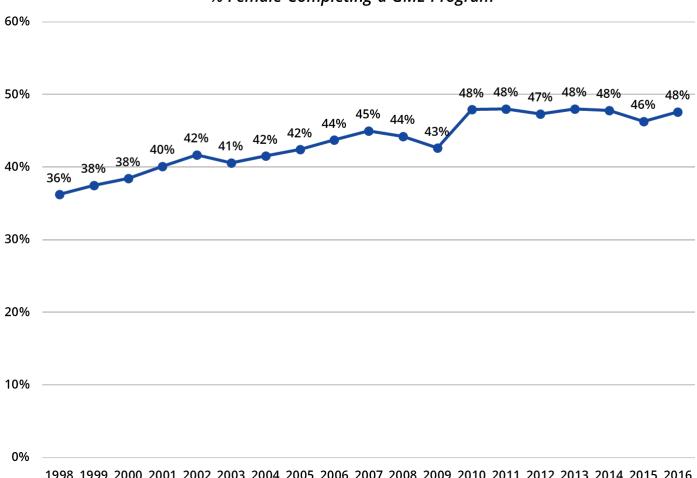

### The Income of New Physicians has Increased Over Time

#### New Physician Income in 2016 Dollars \$300,000 \$243,372 \$250,000 \$228,104 \$227,425 \$222,333 \$219,195 \$201,456 \$206,107 \$221,159 \$200,000 \$187,938 \$150,000 \$100,000 \$50,000 2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016

#### The Percent of Females Completing a **GME Program has Increased Over Time**

#### % Female Completing a GME Program

1998 1999 2000 2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016

# Are Gender Differences in Physician Income Increasing or Decreasing?

- New York Resident Exit Survey (2001 2016)
- Respondents with Confirmed Practice Plans
   IMGs on Temporary Visas were Excluded
- Series of OLS Regression Models (one for each year of the survey)
- Adjusting for a variety of factors

# Variables Included in Physician Income Regression Models (2001 -2016)

#### **Variables**

Gender

Race/Ethnicity

Age

Type of Medical Education (MD or DO)

Citizenship Status

Practice Location (Urban, Rural, etc.)

**Patient Care Hours** 

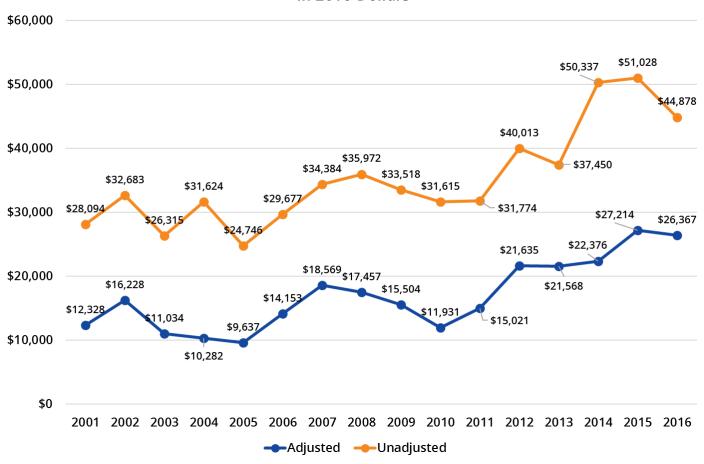

Practice Setting (Group, Hospital Inpatient, Emergency Room, etc.)

Specialty

# Gender Differences in Physician Income are Increasing

#### Adjusted and Unadjusted Gender Difference in Physician Income in 2016 Dollars

## Gender Differences in Physician Income by Primary Care Specialties, 2014-2016

	Income Difference	Significance
Family Medicine	-\$20,134	.0001
General IM	-\$15,214	.0000
General Pediatrics	-\$2,759	.0000
Obstetrics/Gynecology	-\$12,697	.0001

Negative dollars indicate that females earn less than males

### Do "Very Important" Job Characteristics Affect Gender Differences in Income?

	Female	Male
Predictable start and end time each workday	43.5%*	33.3%
Length of each workday	41.5%*	30.9%
Frequency of overnight calls	54.2%*	44.7%
Frequency of weekend duties	53.0%*	43.0%

<sup>\*</sup> *p* < .05 for t-test

#### Summary

- Gender differences in physician income have increased over time despite more women entering medicine
- These differences continue to persist after adjusting for a wide range of factors
