## PREFACE

This report is a profile of the supply and distribution of physicians licensed in New York State based on information compiled by the Center for Health Workforce Studies. With presentation of physician workforce data at several aggregate levels including state, region, county, and specialty, the report is intended to provide useful information for policy makers, educators, and other interested parties across the state.

This report was prepared by the Center for Health Workforce Studies (CHWS), by David Armstrong, Rakkoo Chung, Stuart Daman, and Gaetano Forte. Funding for this report was provided by the New York State Department of Health. CHWS, established in 1996, is based at the School of Public Health, University at Albany, State University of New York (SUNY). The mission of CHWS is to provide timely, accurate data and conduct policy-relevant research about the health workforce. The research conducted by CHWS supports and promotes health workforce planning and policymaking at local, regional, state, and national levels. The views expressed in this report are those of CHWS and do not necessarily represent positions or policies of the School of Public Health, University at Albany, SUNY, the New York State Education Department, or the New York Department of Health.

*May 2015*

## ACKNOWLEDGMENT

The authors wish to acknowledge the New York State Education Department for its assistance with the data collection process that supports this work. The authors also wish to acknowledge the editing and layout design of Leanne Keough. Funding for this report and related data collection efforts was provided by the New York State Department of Health.

# EXECUTIVE SUMMARY

This report summarizes information from the New York State Physician Licensure Re-registration Survey and the SK&A Office-based Physician Database, as adjusted to official counts of licensed physicians in 2014. In addition to presenting basic data for the state as a whole, the report contains a series of statistical profiles: 1 for each New York State Department of Labor region, 1 for each county, 1 for each medical specialty group, and 1 for each individual medical specialty.

Several of the most important observations about these data are summarized below:

- Of the 92,984 licensed physicians in New York, 78% (72,969) were active patient care physicians practicing in the state
  - Of these, 70% were located in downstate New York and 92% were in urban counties
- The ratio of physicians to the population was highest in the Long Island region, with 432 active patient care physicians per 100,000 population
  - The ratio was lowest in the North Country, with 215 physicians per 100,000 population
- More than 22,000 physicians (30% of the total) reported 1 of the primary care specialties (family medicine, general internal medicine, and general pediatrics) as their principal specialty
- The most common principal specialty reported among active patient care physicians was general internal medicine (11,188 or 15% of the total)
  - The next most common principal specialties were family medicine (8%), general pediatrics (7%), and psychiatry (7%)
- Seventy-eight percent (78%) of physicians indicated they were certified by the nationally recognized American Board of Medical Specialties in their principal specialty
  - This figure varied significantly across specialties, from 59% in child and adolescent psychiatry to 87% in thoracic surgery
- Group practice was the largest principal practice setting in 2014, reported by 33% of responding physicians
  - Hospital practice (31%) and solo practice (25%) were the next most frequently reported practice settings
- New York physicians were predominantly male (66%) in 2014
  - Women physicians were younger than men, reflecting the growing number of women entering the profession
  - The average age of female physicians was 48 versus 53 for male physicians
- Seventy-two percent (72%) of physicians were non-Hispanic Whites
  - Underrepresented minorities (URMs) (Blacks/African Americans, Hispanics/Latinos, and American Indians/Alaska Natives) made up 9% of the physician workforce in 2014, but approximately 35% of New York's population

---

1. Downstate New York includes the following counties: Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk, and Westchester.

2. The urban/rural distinction is based on Ebert's typology (see Eberts P, Merschrod K. Socioeconomic Trends in New York State 1950-2000. Albany, NY: New York State Legislative Commission on Rural Resources; 2004).

- Thirty-three percent (33%) of active patient care physicians reported they were international medical graduates (IMGs), meaning they attended medical school in a foreign country (other than Canada)
  - There were significant variations in the percentage of IMGs by specialty (eg, 50% of pathologists reported being IMGs while only 8% of dermatologists reported being IMGs)

# BACKGROUND

Physicians are central to the delivery of health care to the citizens of New York. This report provides a variety of numerical measures of the size and nature of the physician workforce in the state. An effort has been made to design the tables and the figures in the report to reveal patterns that can help planners and policy makers develop programs to improve health care in the state.

## The New York Health Workforce Data System

In 2014, over 92,000 physicians held licenses from the New York State Education Department to practice medicine in New York. All physicians are required to register with the State Education Department every 2 years. When physicians renew their licenses they are also provided with the opportunity to complete a survey (Appendix A) that requests information about a number of demographic, professional, and practice characteristics. This survey has been ongoing since 1997 and there have been more than 340,000 responses. However, in recent years the response rate to the survey has declined substantially. While the response rate for the survey used to be above 75%, during the last 5 years it has dropped below 5%. As a result, data from the survey were supplemented with information from the SK&A Office-based Physician Database<sup>3</sup> to form the bases of this report. The SK&A Office-based Physician Database includes information about a physician's practice address and specialty, but it does not contain information about the number of hours a physician practices each week and other important practice characteristics. The SK&A data also only includes information for approximately half of the physicians licensed in the state. Once the New York Licensure Re-registration Survey data was supplemented with the SK&A data, the new database contained information on more than 60,000 licensed physicians in the state. However, for a number of variables (eg, setting) there were high levels of missing data (see Appendix B). Therefore, caution should be used when interpreting the numbers presented in this report.

## Limitations

It is important to note several limitations of this profile caused by the reduced response rate to the re-registration survey and inadequacy of the data sources used to supplement the survey data. These limitations include:

- Limited number of workforce variables, including a key measure of physician work effort: full-time equivalents
- Limited trend analysis and comparisons over time
- Less robust estimates due to aging observations
- Data quality continuing to deteriorate over time

---

3. For more information about the SK&A physician database see: [http://www.skainfo.com/physician\\_database/physician\\_database.php](http://www.skainfo.com/physician_database/physician_database.php)

Efforts were made to present as much data as we felt comfortable presenting. Unless the response rate to the re-registration survey increases or some alternative data collection solution is implemented, the quality of the physician data will continue to decline. For this profile, we were unable to present data on patient care work effort (FTEs) for the physician workforce. As the observations in the physician re-reregistration data continue to age, there will be other potential exclusions, such as the individual county and specialty profiles. Eventually, this report will no longer be viable as the data necessary to support it will not be available.

## STATE PROFILE

## 2009-2013 Population

**New York**  
19,487,053

### Profile of Active Patient Care Physicians, 2014

Number of Physicians	72,969
Average Age	51
Percent Female	34%
Percent Underrepresented Minority	9%
Percent International Medical Graduate	33%
Percent NY Medical Graduate	40%
Percent with Residency Training in NY	77%

### Physician Supply, 2014

<u>Specialty Group<sup>a</sup></u>	<u>Counts</u> <u>Phys</u>	<u>Per 100k Pop.</u> <u>Phys</u>
Primary Care	22,171	114
Non-Primary Care	50,798	261
<i>Ob/Gyn</i>	3,874	20
<i>IM Specialties</i>	10,667	55
<i>General Surgery</i>	1,798	9
<i>Surgical Specialties</i>	8,849	45
<i>Facility Based</i>	8,523	44
<i>Psychiatry</i>	6,302	32
Total (All Physicians)	72,969	374

<sup>a</sup>Other physician specialties are not displayed but are included in the non-primary care total.

### Selected Population Characteristics, 2009-2013

	<u>Ages 0-19</u>	<u>Ages 20-64</u>	<u>Ages 65+</u>	<u>Total</u>	<u>% of Pop.</u>

# RURAL COUNTIES

**Board Certification and Completion of Accredited Residency**

**Number of Hospitals to Which Physicians Have Admitting Privileges**

**Age Distribution of Active Patient Care Physicians**

**Principal Practice Setting of Active Patient Care Physicians**

## REGIONAL PROFILES

## REGIONAL PROFILES

This section presents a series of statistical profiles, one for each of the 10 CHWS New York Health Workforce Regions. In addition to basic counts and characteristics of physicians, the profiles present information on practice settings, board certification, location of residency training, and FTE counts by activity and specialty category in the workforce regions. The tabulations include only active patient care physicians and all of the figures exclude medical residents.

The map below shows the names of and the counties that comprise each workforce region.

**Table 1. CHWS New York Health Workforce Regions**

<u>Region</u>	<u>Counties Included</u>
Capital District	Albany, Columbia, Greene, Rensselaer, Saratoga, Schenectady, Warren, and Washington
Central New York	Cayuga, Cortland, Onondaga, and Oswego
Finger Lakes	Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates
Hudson Valley	Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester
Long Island	Nassau and Suffolk
Mohawk Valley	Fulton, Herkimer, Madison, Montgomery, Oneida, and Schoharie
New York City	Bronx, Kings, New York, Queens, and Richmond
North Country	Clinton, Essex, Franklin, Hamilton, Jefferson, Lewis, and St. Lawrence
Southern Tier	Broome, Chemung, Chenango, Delaware, Otsego, Schuyler, Steuben, Tioga, and Tompkins
Western New York	Allegany, Cattaraugus, Chautauqua, Erie, and Niagara

## MEDICAL SPECIALTY GROUP PROFILES

## MEDICAL SPECIALTY GROUP PROFILES

This section presents a series of statistical profiles, one for each medical specialty group identified below (see Table 2). Each profile displays basic data on the number of physicians in and demographic composition of the specialty groups, as well as tabulations describing practice patterns. The tabulations are estimates for active patient care physicians. Physicians who reported no patient care hours were excluded from the tabulations, as were medical residents.

**Table 2. Medical Specialty Groups**

<u>Medical Specialty Group</u>	<u>Specialties Included</u>
Primary Care	Family Medicine, General Internal Medicine, and General Pediatrics
Obstetrics/Gynecology	Obstetrics and Gynecology and Gynecology
IM Specialties	Cardiovascular Disease, Critical Care, Endocrinology and Metabolism, Gastroenterology, Geriatrics, Infectious Disease, Nephrology, Pulmonary Disease, Rheumatology, Medical Oncology, Other IM Specialties
General Surgery	General Surgery
Surgical Specialties	Ophthalmology, Otolaryngology, Neurological Surgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology, and Other Surgical Specialties
Facility Based	Anesthesiology, Pathology, and Radiology
Psychiatry	Adult Psychiatry and Child and Adolescent Psychiatry
Other	Allergy and Immunology, Dermatology, Emergency Medicine, Neurology, Occupational Medicine, Pediatric Subspecialty, Physical Medicine and Rehabilitation, Preventive Medicine, and Other

## APPENDIX A: SURVEY INSTRUMENT

**PRACTICE SPECIALTY IN WHICH YOU SPEND MOST OF YOUR PROFESSIONAL TIME**

Mark **ONE** principal specialty and **ONE** secondary specialty, if applicable.

Principal Secondary

- Allergy & Immunology
- Anesthesiology
- Dermatology
- Emergency Medicine
- Family Medicine
- General Practice
- Internal Medicine (General)
- Cardiovascular Disease
- Critical Care
- Endocrinology, Diabetes and Metabolism
- Gastroenterology
- Geriatrics
- Infectious Disease
- Medical Oncology
- Nephrology
- Pulmonary Disease
- Rheumatology
- Other Internal Medicine Sub-specialty
- Neurology
- Obstetrics and Gynecology
- Gynecology (Only)
- Occupational Medicine
- Ophthalmology
- Otolaryngology
- Pathology (General)
- Pathology (Sub-specialty)
- Pediatrics (General)
- Pediatrics (Sub-specialty)
- Physical Medicine and Rehabilitation
- Preventive Medicine
- Psychiatry—Adult
- Psychiatry—Child & Adolescent
- Radiology—Diagnostic
- Radiology—Therapeutic
- Surgery (General)
- Surgery, Neurological
- Surgery, Orthopedic
- Surgery, Plastic
- Surgery, Thoracic
- Other Surgical Sub-specialty
- Urology
- Other

SERIAL

**19 What percent of your direct patient care time is spent in your principal specialty?**

- 0%     1-19%     20-39%     40-59%
- 60-79%     80-99%     100%

**20 Training and Certification:**

	Completed Accredited Residency Program	Board Certified/Cert. of Added/Special Qualification
Principal Specialty	<input type="radio"/> Y <input type="radio"/> N	<input type="radio"/> Y <input type="radio"/> N
Secondary Specialty	<input type="radio"/> Y <input type="radio"/> N	<input type="radio"/> Y <input type="radio"/> N

**21 In the next year, do you plan to: (Mark all that apply.)**

- Retire from patient care?
- Significantly reduce patient care hours?
- Move your practice to a location in New York?
- Move your practice out of New York?

**22 Does your principal practice site use an electronic health record (EHR)? An EHR is a computerized version of a patient's medical information.**

- Yes, all electronic     No
- Yes, part paper, part electronic     Don't know

**23 Does your principal practice site use a computerized system...**

	Yes	No
for computerized provider order entry (CPOE)?	<input type="radio"/>	<input type="radio"/>
to generate/transmit prescriptions? (excluding fax)	<input type="radio"/>	<input type="radio"/>
to record patient demographics?	<input type="radio"/>	<input type="radio"/>
to record patient smoking status?	<input type="radio"/>	<input type="radio"/>
to maintain patient problem lists on current & active diagnoses?	<input type="radio"/>	<input type="radio"/>
for drug-drug and drug-allergy interaction checks?	<input type="radio"/>	<input type="radio"/>
to maintain active medication lists?	<input type="radio"/>	<input type="radio"/>
to maintain medication allergy lists?	<input type="radio"/>	<input type="radio"/>
to record and chart changes in patient vital signs?	<input type="radio"/>	<input type="radio"/>
for at least one clinical decision support rule?	<input type="radio"/>	<input type="radio"/>
to report clinical quality measures to CMS/state?	<input type="radio"/>	<input type="radio"/>
to provide patients an electronic copy of their health information?	<input type="radio"/>	<input type="radio"/>
to provide patients with a clinical summary for each office visit?	<input type="radio"/>	<input type="radio"/>

**24 Does your principal practice site...**

	Yes	No
exchange key clinical information with other providers?	<input type="radio"/>	<input type="radio"/>
send clinical information through a Regional Health Information Organization (RHIO)?	<input type="radio"/>	<input type="radio"/>
receive clinical information through a RHIO?	<input type="radio"/>	<input type="radio"/>
protect confidential electronic health information?	<input type="radio"/>	<input type="radio"/>

New York State Education Department

**Physician Survey**

This questionnaire is a supplemental part of your registration application. Please complete and return it with the registration form and fee in the envelope provided. If you complete the survey online, you do not have to complete this form.

Your responses will be maintained in a strictly confidential manner by the Center for Health Workforce Studies (<http://chws.albany.edu>) at the School of Public Health, University at Albany, SUNY. The responses will be analyzed and presented only in aggregate form to document changes in the physician workforce in New York.

Item 2 asks for your NYS license number. This number can be found on the enclosed registration application. Thank you for taking the time to complete this survey.

**INSTRUCTIONS**

- Make dark marks that completely fill the circle.
- Erase cleanly any marks you wish to change.
- Make no stray marks on this form.

CORRECT: ●    INCORRECT:

60-79%	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
80-99%	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
100%	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**16 Which statement best describes your malpractice liability insurance coverage?**

- I pay for my individual policy.
- My employer/practice pays for/ provides my insurance coverage.
- I do not carry malpractice liability insurance.
- Other

**17 Mark the statement that best describes your patient care practice status.**

- I cannot accept any additional patients; my practice is full.
- I can accept some additional patients; my practice is nearly full.
- I can accept many additional patients; my practice is far from full.

## APPENDIX B: DATA AND METHODS

# APPENDIX B: DATA AND METHODS

## 1. File Description

The tabulations in this report are based on information from the Center for Health Workforce Studies' (CHWS) New York State Licensure Re-registration Survey and the SK&A Office-based Physician Database. Unlike previous reports in this series, information from the SK&A Office-based Physician Database was used to supplement the data from the New York Physician Licensure Re-registration Survey due to the poor response rate in recent years (less than 5%). After combining the 2 datasets, there was information on 60,720 licensed physicians in New York. However, given the age of the CHWS data and the limited information contained in the SK&A database, several assumptions were made in estimating the number of active patient care physicians in New York. The first assumption was that all physicians in the SK&A database with a valid New York address were active patient care physicians. Next, if physicians were in the re-registration survey database and not in the SK&A database, the estimate of the number of active patient care physicians was determined by the same procedure used in previous reports in this series with 2 exceptions due to the age of the data. First, physicians over the age of 79 were assumed to be retired. Second, data in the re-registration survey database over 8 years old was excluded except for variables that should not change (eg, race, medical school location). Ultimately, 53,379 out of the 60,720 physicians licensed in New York were determined to be active patient care physicians using this approach. Historical information from the re-registration survey was then used to weight the sample to account for missing data (see Figure B-1).

**Figure B-1. Estimates of Physician Counts in New York, 2014**

## 2. Limitations

It is important to note several limitations of this profile caused by the reduced response rate to the re-registration survey and inadequacy of the data sources used to supplement the survey data.

- **Limited number of workforce variables:** As stated above, the physician re-registration survey database and the SK&A physician database do not share all of the same variables. One important variable is hours per week providing patient care. Without this information, full-time equivalents (a measure of work effort) cannot be calculated. The absence of this information severely limits the usefulness of the profile, as historically work effort has been found to vary by gender, age, setting, specialty, and geography. FTE information is not presented in this profile.
- **Limited trend analysis and comparisons over time:** The limited information also affects our ability to make comparisons with past information presented in the annual physician profile reports. In this report, the most visible example is our inability to show trends in FTEs and FTEs

per 100,000 around the state, regionally, and by county.

- **Less robust estimates due to aging observations:** In order to compile and manipulate the data presented in this report, a more complicated process was undertaken than was employed in the past. First, the reregistration survey data were examined and reviewed for age – that is, observations were evaluated for the likelihood that they might have changed since they were collected. Variables such as gender, year of birth, and location of high school and medical school attended, are much less likely to change than others and therefore older observations can be used. However, for variables such as current status (active/retired), practice address, or hours spent in various professional activities, a more stringent rule had to be applied: if the observations were more than 8 years old, they were excluded. Both the supplemental SK&A data and the remaining re-registration data were merged with NYSED licensure database using an algorithm that referenced both a physician’s license number and name.

As a result of the process necessary to prepare and merge these data, the estimates produced for this report are less robust than those produced in the past. Since there is no comprehensive reference physician database available, it is impossible to measure how the database compiled for this report diverges from reality. We have tried to be as transparent as possible in the description of the data and methods employed so that users of the information presented in this report can be aware of its limitations.

- **Data quality continuing to deteriorate over time:** We do know, however, that unless improvement in the response rate to the re-registration survey occurs or some alternative data collection solution is implemented, the quality of the physician data presented in this report will continue to decline. For this profile, we were unable to present data on patient care work effort (FTEs) for the physician workforce. As the observations in the physician re-reregistration data continue to age, there will be other potential exclusions, such as the individual county and specialty profiles. Eventually, this report will no longer be viable as the data necessary to support it will not be available.

### 3. Missing Data

Due to the age of the re-registration survey data and the lack of information in the SK&A database, several key variables had a large amount of missing data. The following table documents this issue:

**Table B-1. Percentage of Missing Data Variables**

Variable	% Missing Data
Age	12.3%
Gender	0.6%
Race/Ethnicity	17.2%
Medical School Location	13.7%
Residency Training Location	13.5%
Practice Setting	29.4%
Board Certification	27.5%
Completion of Accredited Residency	27.5%
Admitting Privileges	25.0%

#### 4. Upstate and Downstate New York Definition

In this report, downstate New York is comprised of all counties in the New York City and Long Island regions and Westchester County. All other counties are considered upstate New York.

#### 5. Urban and Rural County Definition

Counties with populations of less than 200,000 are considered rural. This definition is part of “Eberts’ typology” and comes directly from state Public Health Law. For more information regarding this classification scheme, see: Eberts P, Merschrod K. Socioeconomic Trends in New York State 1950-2000. Albany, NY: New York State Legislative Commission on Rural Resources; 2004.

Forty-three of the 62 counties in New York are considered rural by this definition:

**Table B-2. Rural Counties in New York State**

Allegany	Franklin	Ontario	Steuben
Cattaraugus	Fulton	Orleans	Sullivan
Cayuga	Genesee	Oswego	Tioga
Chautauqua	Greene	Otsego	Tompkins
Chemung	Hamilton	Putman	Ulster
Chenango	Herkimer	Rensselaer	Warren
Clinton	Jefferson	Schenectady	Washington
Columbia	Lewis	Schoharie	Wayne
Cortland	Livingston	Schuyler	Wyoming
Delaware	Madison	Seneca	Yates
Essex	Montgomery	St. Lawrence	

## 6. Principal Practice Setting Categories

In 2009, the practice setting question on the survey was replaced with new questions about practice location (Q10) and practice size (Q12). The setting category in this report was formed using the questions from the pre-2009 and 2009 surveys as shown below.

<b>Solo</b>	Solo Practice (pre-2009) Private Office/Medical Arts Building and Practice Size of 1 Physician (2009)
<b>Group</b>	Physician Partnership (pre-2009) Group Practice-Owner/Operator (pre-2009) Group Practice-Employee/Staff (pre-2009) Private Office/Medical Arts Building and Practice Size of >1 Physician (2009)
<b>Hospital</b>	Hospital-Inpatient (pre-2009) Hospital-Outpatient Department (pre-2009) Hospital-Satellite (pre-2009) Hospital-Emergency Room (pre-2009) Hospital (2009)
<b>Other</b>	Free-Standing Health Center or Clinic (D & TC) (pre-2009) Staff Model HMO (pre-2009) Nursing Home (pre-2009) Home Health (pre-2009) State or Local Health Department (pre-2009) Other Setting (pre-2009) Freestanding Health Center/Clinic/Urgent Care Center (2009) Nursing Home/Other Residential Facility (2009) State/Local Health Department (2009) Other (2009)

## 7. Important Notes

It must be emphasized that the data presented in this report are estimates and are subject to a certain degree of error, especially in the case of rare events, small populations, and missing data. Finally, due to confidentiality agreements, cells with counts below 5 are indicated as "--" throughout the report.

Unemployment Rate in the selected population characteristics table was obtained from the U.S. Bureau of Labor Statistics. These data were retrieved on March 31, 2015 from <http://www.bls.gov/Lau/>.

The population, race and ethnicity, and age data in the selected population characteristics table were obtained from the U.S. Census Bureau, American Community Survey 2009-2013. These data were retrieved on March 31, 2015 from <http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml>.

The information in the health status indicators table was obtained from the New York State Department of Health, New York State Community Health Indicator Reports. These data were retrieved on March 31, 2015 from <http://www.health.ny.gov/statistics/chac/indicators/>.

## APPENDIX C: COUNTY SUMMARY
