Better Information for Better Outcomes

This page intentionally left blank.

PREFACE

This report presents a profile of the supply and distribution of physicians licensed in New York. The report presents data collected via the Center for Health Workforce Studies' New York State Physician Licensure Re-registration Survey in 2004 and 2005. This report presents physician workforce data at several aggregate levels, including state, region, county, and specialty. The report is intended to provide useful information for policy makers, educators, and other interested parties across the state.

This report was prepared by the Center for Health Workforce Studies at the University of Albany, State University of New York by David P. Armstrong and Gaetano J. Forte. The Center is dedicated to the collection, analysis, and distribution of health workforce data to assist health, professional and educational organizations; policy makers; and the public understand issues related to the supply, demand, distribution, and use of health workers. The views expressed in this report are those of the Center for Health Workforce Studies and do not necessarily represent positions or policies of the University at Albany, State University of New York, the School of Public Health, or the New York State Education Department.

December 2006

ACKNOWLEDGMENT

The authors wish to acknowledge the New York State Education Department for its aid in the data collection process that supports this work. The authors also wish to acknowledge the fine work of Claire Siconolfi, Helene Boetius, Steffon Martin, and Melissa Wurzburg in processing the data analyzed and presented in this report.

EXECUTIVE SUMMARY

This report summarizes the responses to the 2004-2006 Survey of Licensed Physicians in New York State, as adjusted to official counts of licensed physicians in 2004 and 2005. The estimated numbers of physicians and the profiles of their demographic characteristics are the latest available for the state of New York.

In addition to presenting basic data for the state as a whole, the report presents three series of statistical profiles, one for each of the New York State Department of Labor workforce regions, one for New York counties, and one for the medical specialties included in the 2004-2006 questionnaire.

A few of the most important findings of the study are summarized below:

- ❖ Of the 77,471 licensed physicians in New York, 80% (61,931) were active patient care physicians. Of these, 70% were located in downstate* New York and 79% were in urban counties.
- ❖ The ratio of physicians to the population was highest in the New York City region, with 364 active patient care physicians per 100,000 persons. The ratio was lowest in the Mohawk Valley, with 147 physicians per 100,000 persons.
- ❖ Despite overall growth in the physician supply between 2001 and 2005, some regions experienced declines in the number of patient care physicians. The Finger Lakes and Western New York regions experienced physician declines of 6% and 10%, respectively, between 2001 and 2005.
- ❖ More than 18,000 physicians (30% of the total) reported one of the Primary Care Specialties (Family Practice, General Internal Medicine, and General Pediatrics) as their principal specialty.
- ❖ Between 2001 and 2005, primary care physician supply grew in all regions of the state except the Finger Lakes, North Country, and Western New York. The change in primary care physician supply in these regions ranged from a 2% decline in the Finger Lakes to an 8% decrease in the North Country.
- ❖ Non-primary care physician supply grew in all regions of the state except the Finger Lakes, Mohawk Valley, and Western New York. Decline of non-primary care physician supply in these areas ranged from 1% in the Mohawk Valley to 11% in Western New York.
- ❖ Physicians were predominantly male (71%) in 2005. However, women physicians were significantly younger than men, reflecting the growing number of women entering the profession. The average age of female physicians was 47.0, versus 52.5 for male physicians.
- ❖ Over 70% of physicians were Whites Non-Hispanic. Underrepresented minorities (Blacks/African-Americans, Hispanics/Latinos, and American Indians) made up 10% of the physician supply in 2005. URMs made up approximately 35% of New York's population, however.
- ❖ The most common principal specialty reported was General Internal Medicine with more than 9,300 active patient care physicians (15% of the total). This was followed by Adult Psychiatry (9%), Family Practice (7%), and General Pediatrics (7%).

* Downstate New York includes the following counties: Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk, and Westchester.

- ❖ Seventy-five percent (75%) of physicians indicated that they were certified by a nationally recognized member board of the American Board of Medical Specialties in their principal specialty. These figures vary significantly across specialties, from 52% in Occupational Medicine to 85% in Pathology.
- ❖ Thirty-five percent (35%) of active patient care physicians reported that they were International Medical Graduates (IMGs), that is, they attended medical school in a foreign country (other than Canada). There were significant variations in the percentage of IMGs by specialty, with Pathology and Physical Medicine and Rehabilitation each reporting 52% and Dermatology reporting fewer than 9%.
- ❖ Group practice was the largest principal practice setting in 2005 with 37% of responding physicians. Solo practice (28%) and hospital practice (26%) were the next most frequent settings.

BACKGROUND

Physicians are central to the delivery of health care to the citizens of New York. This report provides a variety of numerical measures of the size and nature of the physician workforce in the state. An effort has been made to design the tables and the figures in the report to reveal patterns that can help planners and policy makers design programs to improve healthcare in the state.

Physician Data Files

In 2005, more than 77,000 physicians held licenses from the New York State Education Department to practice medicine in New York. All physicians are required to register with the State Education Department every two years. The last registration cycle began in January 2004 and ended in December 2005. Included in each registration packet was a questionnaire (Appendix A) that requested responding physicians to provide information on a number of personal, professional, and practice characteristics. The responses to these questionnaires for the years 2004 and 2005 were the basis for the tabulations presented in this report. During this period the survey had an estimated response rate of 83.7% (64,904/77,471). Other data sources included the New York State Department of Health and the U.S. Census Bureau (see Appendix B).

Several files were created from the survey data, each including slightly different numbers of respondents (see Appendix B). One of these files formed the basis of this report. File E, which includes all active full-time and part-time physicians who do not practice exclusively out of state, was used to examine the overall work profile of physicians active in medicine in New York. This file excludes medical residents since they are not required to be licensed and many of them are not eligible for licensure. The file also incorporates a weighting factor to account for non-respondents to the survey.

Important Notes

Due to the cyclical registration process in New York, the numbers reported in the following pages should not be viewed as a snap shot in time of the current physician workforce. Rather, they should be looked at as a general picture of the physician workforce during the years 2004 and 2005. For convenience, however, the numbers and tabulations reported reference the year 2005. It also must be emphasized that the data presented in this report are estimates and are subject to a certain degree of error, especially in the case of rare events, small populations, and missing data. Finally, due to confidentiality agreements, cells with counts below 5 are indicated as "--" throughout the report.

RURAL COUNTIES

REGIONAL PROFILES

This page intentionally left blank.

REGIONAL PROFILES

This section presents a series of statistical profiles, one for each of the ten New York State Department of Labor Workforce Regions. In addition to basic counts and characteristics of physicians, the profiles present information on practice settings, board certification and residency training, and FTE counts by activity and specialty category in the Workforce Regions. The tabulations cover only active, patient care physicians and all of the figures exclude medical residents.

The map below shows the names and locations of each of the Workforce Regions. It also shows the counties that comprise each Workforce Region.

Figure RE-1. Map of New York State Department of Labor Workforce Regions

Table RE-1. Map of New York State Department of Labor Workforce Regions

<u>Region</u>	<u>Counties Included</u>
Capital District	Albany, Columbia, Greene, Rensselaer, Saratoga, Schenectady, Warren, and Washington
Central New York	Cayuga, Cortland, Onondaga, and Oswego
Finger Lakes	Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates
Hudson Valley	Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester
Long Island	Nassau and Suffolk
Mohawk Valley	Fulton, Herkimer, Madison, Montgomery, Oneida, and Schoharie
New York City	Bronx, Kings, New York, Queens, and Richmond
North Country	Clinton, Essex, Franklin, Hamilton, Jefferson, Lewis, and St. Lawrence
Southern Tier	Broome, Chemung, Chenango, Delaware, Otsego, Schuyler, Steuben, Tioga, and Tompkins
Western New York	Allegany, Cattaraugus, Chautauqua, Erie, and Niagara

SPECIALTY GROUP PROFILES

This page intentionally left blank.

SPECIALTY GROUP PROFILES

This section presents a series of statistical profiles, one for each medical specialty group identified below (see Table SG-1). Each profile displays basic data on the numbers and demographic composition of the specialty groups, as well as tabulations describing practice patterns. The tabulations are estimates for active patient care physicians. Physicians reporting no patient care hours have been excluded from the tabulations, as have medical residents.

Table SG-1. Medical Specialty Groups

<u>Specialty Group</u>	<u>Specialties Included</u>
Primary Care	Family Practice, Internal Medicine (General), and Pediatrics (General)
Obstetrics and Gynecology	Obstetrics and Gynecology and Gynecology
IM Specialties	Cardiovascular Disease, Critical Care, Endocrinology and Metabolism, Gastroenterology, Geriatrics, Infectious Disease, Nephrology, Pulmonary Disease, Rheumatology, Medical Oncology, Other IM Specialties
Surgery (General)	Surgery (General)
Surgical Specialties	Ophthalmology, Otolaryngology, Neurological Surgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology, and Other Surgical Specialties
Facility Based	Anesthesiology, Pathology, and Radiology
Psychiatrists	Adult Psychiatry and Child and Adolescent Psychiatry
Other	Allergy and Immunology, Dermatology, Emergency Medicine, Neurology, Occupational Medicine, Pediatric Sub-specialty, Physical Medicine and Rehabilitation, Preventive Medicine, and Other

- Surgery, Orthopedic
- Surgery, Plastic
- Surgery, Thoracic
- Other Surgical Sub-specialty
- Urology
- Other

What percent of your direct patient care time is spent in your principal specialty?

- 0–20%
- 21–40%
- 41–60%
- 61–80%
- 81–100%

Training and Certification:

	Completed Accredited Residency Program	Board Certified/Cert. of Added/Special Qualification
Principal Specialty	<input type="radio"/>	<input type="radio"/>
Secondary Specialty	<input type="radio"/>	<input type="radio"/>

**In the next 12 months, do you plan to:
(Please mark all that apply)**

- retire from patient care?
- significantly reduce patient care hours?
- move your practice to another geographic location in NYS?
- move your practice out of state?

Mark the response that best describes your patient care practice status or activities:

- I cannot accept any new/additional patients; my practice is full
- I can accept some new/additional patients; my practice is nearly full
- I can accept many new/additional patients; my practice is far from full
- Not applicable

**Do you use the Internet/email for any of the following:
(Please mark all that apply.)**

- To obtain lab results, x-rays or hospital records?
- To obtain information about treatment alternatives?
- To communicate with/answer questions from your patients?
- To obtain Continuing Medical Education credits?
- To transmit prescriptions to pharmacies?

RACIAL/ETHNIC ORIGIN (MARK ONE)

- Native American or Alaskan Native
- Asian or Pacific Islander
- Black/African American (Not Hispanic)
- Hispanic/Latino (Puerto Rican)
- Hispanic/Latino (All other)
- White (Not Hispanic)

PHYSICIAN SURVEY

2004–2006

This questionnaire is part of your registration application. Complete and return it with the registration form and fee.

Your responses to this survey are confidential. Item 1 asks for your NYS license number. This is clearly indicated on the enclosed registration application.

Instructions

- Use a No. 2 pencil only.
- Make dark marks that completely fill the circle.
- Erase cleanly any answer you wish to change.
- Do not make any stray marks on this form.

PATIENT CARE: Practice Locations

Location of sites where you spend the most time providing **direct patient care**. Print the address of your practice location(s) including your 5-digit zip code. Also, indicate the average hours per week you spend at each practice location.

Principal Location

Number _____ Street _____

City/Town _____ State _____

Zip Code

APPENDIX B: DATA AND METHODS

This page intentionally left blank.

APPENDIX B: DATA AND METHODS

1. File Descriptions

Five different data files were created from the survey response data. All of the tabulations in this report were of active patient care physicians (File E). Since File E was created by adjusting the other four files, each of the files is described below. State physician estimates for each of the files is presented in Figure B-1.

A	Baseline Survey Response File	64,904
	<i>Less Inactive and Retired Work Status (Q5) and less Blank Work Status with no Practice Location (Q10) and no Patient Care Hours (Q7)</i>	<i><u>- 4,069</u></i>
B	Physicians Active in Medicine	60,835
	<i>Less Physicians with only out-of-state Practice Locations (Q10)</i>	<i><u>- 6,589</u></i>
C	Active in Medicine in NYS	54,246
	<i>Less Residents (Q6)</i>	<i><u>- 1,307</u></i>
D	Active in Medicine in NYS, less Residents	52,939
	<i>Less no Patient Care Hours (Q7)</i>	<i><u>- 809</u></i>
E	Active Patient Care Physicians in NYS	52,130
	<i>Adjust for non-response and out-of-state Practice Locations</i>	<i><u>1.1936*</u> <u>x 0.9953**</u></i>
	Weighted Active Patient Care Physicians in NYS	<i><u>x 1.188</u></i> 61,931

* $77,471/64,904 = 1.1936$

** $10.2\% \text{ out-of-state} \times 4.6\% \text{ unknown Practice Location} = .9953$

Figure B-1. Estimates of Physician Counts in New York, 2005

2. 2001 Active Patient Care Physicians in New York Estimates

The 2001 physician estimates used in the change in supply calculation were based on data from the 2000 and 2001 New York State Physician Licensure Re-registration Survey and were calculated analogously to the 2005 estimates. During 2000 and 2001, the survey had an estimated response rate of 52.3% (38,227/73,036).

3. FTE Estimates

The FTE estimates were calculated as follows:

$$\text{FTE} = \text{Patient Care Hours} / 40$$
where Patient Care Hours (Q6) were estimated by assigning a minimum and maximum value to each Patient Care Hours category (see below) and then making a random draw from a uniform distribution between these minimum and maximum points for each respondent.

<u>Hours/Week</u>	<u>Min.</u>	<u>Max.</u>
None	—	—
1 – 9	1	9
10 – 19	10	19
20 – 29	20	29
30 – 39	30	39
40 +	40	59

4. Upstate and Downstate New York Definition

In this report downstate New York was considered all counties in the New York City and Long Island regions and Westchester County. All other counties were considered upstate New York.

5. Urban and Rural County Definition

Counties with populations of less than 200,000 were considered rural. This definition is part of “Eberts’ typology” and comes directly from state Public Health Law. For more information regarding this classification scheme, see: Eberts R. *Socioeconomic Trends in New York State: 1950-1990*. Albany, NY: New York State Legislative Commission on Rural Resources, September 1994.

The following counties were considered rural by this definition:

Allegany	Hamilton	Schuyler
Cattaraugus	Herkimer	Seneca
Cayuga	Jefferson	St. Lawrence
Chautauqua	Lewis	Steuben
Chemung	Livingston	Sullivan
Chenango	Madison	Tioga
Clinton	Montgomery	Tompkins
Columbia	Ontario	Ulster
Cortland	Orleans	Warren
Delaware	Oswego	Washington
Essex	Otsego	Wayne
Franklin	Putman	Wyoming
Fulton	Rensselaer	Yates
Genesee	Schenectady	
Greene	Schoharie	

6. Principal Practice Setting Categories

Solo	Solo Practice
Group	Physician Partnership (Group-Owner/Partner) Group Practice-Owner/Operator (Group-Owner/Partner) Group Practice-Employee/Staff (Group-Employee)
Hospital	Hospital-Inpatient Hospital-OPD Hospital-Satellite Hospital-Emergency Room
Other	Free-Standing Health Center or Clinic (D & TC) Staff Model HMO Nursing Home Home Health State or Local Health Dept. Other Setting

7. Other Data Sources

Percent in Poverty 2003 and Median Income 2003 in the Selected Population Characteristics' table are from the U.S. Census Bureau, Small Area Income and Poverty Estimates (SAIPE) located at <http://www.census.gov/hhes/www/saipe/index.html> (accessed 08/01/06).

The population, race/ethnicity, and age data in the Selected Population Characteristics' table are from the New York State Department of Health, Information Systems and Health Statistics Group, Bureau of Biometrics and Health Statistics, Claritas (Small Area) Data.

The information in the Health Status Indicators' table is from the New York State Department of Health, New York State County Health Indicator Profiles, 1999-2004 located at <http://www.health.state.ny.us/statistics/chip/index.htm> (accessed 9/25/06).

Population estimates used to estimate the 2001 rates for the change in supply estimates are also from the U.S. Census Bureau.
