Better Information for Better Outcomes

PREFACE

This report offers a profile of the supply and distribution of physicians licensed in New York based on the latest data collected from the Center for Health Workforce Studies' ongoing New York State Physician Licensure Re-registration Survey. With presentations of physician workforce data at several aggregate levels, including state, region, county, and specialty, the report is intended to provide useful information for policy makers, educators, and other interested parties across the state.

This report was prepared by the Center for Health Workforce Studies, School of Public Health, University at Albany, State University of New York by David P. Armstrong and Gaetano J. Forte. This report and data collection effort was funded by the New York State Department of Health. The Center is dedicated to the collection, analysis, and distribution of health workforce data to assist health, professional and educational organizations; policy makers; and the public understand issues related to the supply, demand, distribution, and use of health workers. The views expressed in this report are those of the Center for Health Workforce Studies and do not necessarily represent positions or policies of the School of Public Health, University at Albany, State University of New York, the New York State Education Department, the New York State Department of Health, the Health Resources and Services Administration, or the U.S. Department of Health and Human Services.

December 2008

ACKNOWLEDGMENT

The authors wish to acknowledge the New York State Education Department for its assistance with the data collection process that supports this work. The authors also wish to acknowledge the editing of Lyrissa Smith. Funding for this report and related data collection efforts was provided by the New York State Department of Health.

EXECUTIVE SUMMARY

This report summarizes the responses to the New York State Physician Licensure Re-registration Survey, as adjusted to official counts of licensed physicians in 2006 and 2007. The counts of physicians and the profiles of their demographic characteristics are the latest available for the state of New York.

In addition to presenting basic data for the state as a whole, the report describes five series of statistical profiles: one for the state, one for each CHWS New York health workforce region, one for each county, one for each medical specialty group, and one for each individual medical specialty.

Several of the most important observations about these data are summarized below:

- ❖ Of the 81,006 licensed physicians in New York, 79% (63,847) were active patient care physicians. Of these, 72% were located in downstate New York¹ and 91% were in urban counties.²
- ❖ The ratio of full-time equivalent (FTE)³ physicians to the population was highest in the Long Island region, with 335 active patient care FTE physicians per 100,000 population. The ratio was lowest in the Mohawk Valley, with 168 FTE physicians per 100,000 population.
- ❖ Between 2003 and 2007, some regions experienced very little growth in the number of active patient care FTE physicians per 100,000 population. The Mohawk Valley and North Country regions experienced growth of 3% or less.
- ❖ More than 19,000 physicians (30% of the total) reported one of the primary care specialties (family medicine, general internal medicine, and general pediatrics) as their principal specialty.
- ❖ Between 2003 and 2007, primary care FTE physicians per 100,000 population grew in all regions of the state except the North Country. The primary care FTE physician supply in the North Country declined by 4%.
- ❖ The number of non-primary care FTE physicians per 100,000 population grew in all regions of the state except the Mohawk Valley. The non-primary care FTE physician supply in the Mohawk Valley declined by 2%.
- ❖ New York physicians were predominantly male (69%) in 2007. However, women physicians were significantly younger than men, reflecting the growing number of women entering the profession. The average age of female physicians was 47.5 versus 53.3 for male physicians.
- ❖ Sixty-nine percent (69%) of physicians were non-Hispanic Whites. Underrepresented minorities (URMs) (Blacks/African Americans, Hispanics/Latinos, and American Indians/Alaska Natives) made up 10% of the physician workforce in 2007, but approximately 35% of New York's population.

¹ Downstate New York includes the following counties: Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk, and Westchester.

² The urban/rural distinction was based on Ebert's typology (see Eberts R. *Socioeconomic Trends in New York State: 1950-1990*. Albany, NY: New York State Legislative Commission on Rural Resources, September 1994).

³ Due to changing physician practice patterns FTE (full-time equivalent) physicians are the most appropriate metric for describing physicians practicing in New York.

- ❖ The most common principal specialty reported among active patient care physicians was general internal medicine (9,900 or 16% of the total). The next most common principal specialties were psychiatry (9%), family medicine (7%), and general pediatrics (7%).
- ❖ Eighty-one percent (81%) of physicians indicated they were certified by the nationally recognized American Board of Medical Specialties in their principal specialty. This figure varied significantly across specialties, from 65% in occupational medicine to 90% in radiology.
- ❖ Thirty-six percent (36%) of active patient care physicians reported they were international medical graduates (IMGs), that is, they attended medical school in a foreign country (other than Canada). There were significant variations in the percentage of IMGs by specialty. For instance, 52% of pathologists reported being IMGs while only 10% of dermatologists reported being IMGs.
- ❖ Group practice was the largest principal practice setting in 2007, reported by 37% of responding physicians. Solo practice (28%) and hospital practice (27%) were the next most frequently reported practice settings.

BACKGROUND

Physicians are central to the delivery of health care to the citizens of New York. This report provides a variety of numerical measures of the size and nature of the physician workforce in the state. An effort has been made to design the tables and the figures in the report to reveal patterns that can help planners and policy makers develop programs to improve health care in the state.

The New York Health Workforce Data System

In 2007, over 81,000 physicians held licenses from the New York State Education Department to practice medicine in New York. All physicians are required to register with the State Education Department every two years. Included in the materials distributed to physicians to re-register their licenses is a questionnaire (Appendix A) that requests responding physicians to provide information on a number of personal, professional, and practice characteristics. The responses to these questionnaires during the years 2006 and 2007 were the basis for the tabulations presented in this report. Where data were missing, attempts were made to substitute data from previous iterations of the survey. After adding data from the previous years, the survey had an estimated response rate of 82.5% (66,843 out of 81,006). These data are one component of the New York Health Workforce Data System administered by the Center for Health Workforce Studies. Other components of the data system include similar surveys of dentists, dental hygienists, and registered nurses licensed to practice in New York. Three new surveys are also being prepared for midwifery, nurse practitioners, and physician assistants. Data related to the population and health status were obtained from the New York State Department of Health and the U.S. Census Bureau (see Appendix B).

Several files were created from the survey data, each including slightly different numbers of respondents (see Appendix B). One of these files, File E, formed the basis of this report. File E, which includes all active patient care physicians who do not practice exclusively outside of New York, was used to examine the overall work profile of physicians active in medicine in the state. File E excludes medical residents since they are not required to be licensed and many of them are not eligible for licensure. File E also incorporates a weighting factor to account for non-respondents to the survey.

RURAL COUNTIES

Board Certification and Completion of Accredited Residency

Number of Hospitals to Which Physicians Have Admitting Privileges

Age Distribution of Active Patient Care Physicians

Principal Practice Setting of Active Patient Care Physicians

REGIONAL PROFILES

REGIONAL PROFILES

This section presents a series of statistical profiles, one for each of the 10 CHWS New York Health Workforce Regions. In addition to basic counts and characteristics of physicians, the profiles present information on practice settings, board certification, location of residency training, and FTE counts by activity and specialty category in the workforce regions. The tabulations include only active patient care physicians and all of the figures exclude medical residents.

The map below shows the names of and the counties that comprise each workforce region.

Figure 1. Map of CHWS New York Health Workforce Regions

Table 1. CHWS New York Health Workforce Regions

<u>Region</u>	<u>Counties Included</u>
Capital District	Albany, Columbia, Greene, Rensselaer, Saratoga, Schenectady, Warren, and Washington
Central New York	Cayuga, Cortland, Onondaga, and Oswego
Finger Lakes	Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates
Hudson Valley	Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester
Long Island	Nassau and Suffolk
Mohawk Valley	Fulton, Herkimer, Madison, Montgomery, Oneida, and Schoharie
New York City	Bronx, Kings, New York, Queens, and Richmond
North Country	Clinton, Essex, Franklin, Hamilton, Jefferson, Lewis, and St. Lawrence
Southern Tier	Broome, Chemung, Chenango, Delaware, Otsego, Schuyler, Steuben, Tioga, and Tompkins
Western New York	Allegany, Cattaraugus, Chautauqua, Erie, and Niagara

MEDICAL SPECIALTY GROUP PROFILES

MEDICAL SPECIALTY GROUP PROFILES

This section presents a series of statistical profiles, one for each medical specialty group identified below (see Table 2). Each profile displays basic data on the number of physicians in and demographic composition of the specialty groups, as well as tabulations describing practice patterns. The tabulations are estimates for active patient care physicians. Physicians who reported no patient care hours were excluded from the tabulations, as were medical residents.

Table 2. Medical Specialty Groups

<u>Medical Specialty Group</u>	<u>Specialties Included</u>
Primary Care	Family Medicine, General Internal Medicine, and General Pediatrics
Obstetrics/Gynecology	Obstetrics and Gynecology and Gynecology
IM Specialties	Cardiovascular Disease, Critical Care, Endocrinology and Metabolism, Gastroenterology, Geriatrics, Infectious Disease, Nephrology, Pulmonary Disease, Rheumatology, Medical Oncology, Other IM Specialties
General Surgery	General Surgery
Surgical Specialties	Ophthalmology, Otolaryngology, Neurological Surgery, Orthopedic Surgery, Plastic Surgery, Thoracic Surgery, Urology, and Other Surgical Specialties
Facility Based	Anesthesiology, Pathology, and Radiology
Psychiatry	Adult Psychiatry and Child and Adolescent Psychiatry
Other	Allergy and Immunology, Dermatology, Emergency Medicine, Neurology, Occupational Medicine, Pediatric Subspecialty, Physical Medicine and Rehabilitation, Preventive Medicine, and Other

SERIAL #

What percent of your direct patient care time is spent in
your principal specialty?

- ☐ 0–20%
☐ 21–40%
☐ 41–60%
☐ 61–80%
☐ 81–100%

Training and Certification:

Completed Accredited
Residency Program

Principal Specialty ☐
Secondary Specialty ☐

Board Certified/Cert.
of Added/Special
Qualification ☐

In the next 12 months, do you plan to:
(Please mark all that apply)

- ☐ retire from patient care?
☐ significantly reduce patient care hours?
☐ move your practice to another geographic location in NYS?
☐ move your practice out of state?

Mark the response that best describes your patient care
practice status or activities:

- ☐ I cannot accept any new/additional patients; my practice
is full
☐ I can accept some new/additional patients; my practice is
nearly full
☐ I can accept many new/additional patients; my
practice is far from full
☐ Not applicable

Do you use the internet/email for any of the following:
(Please mark all that apply)

- ☐ To obtain lab results, x-rays or hospital records?
☐ To obtain information about treatment alternatives?
☐ To communicate with/answer questions from your patients?
☐ To obtain Continuing Medical Education credits?
☐ To transmit prescriptions to pharmacies?

RACIAL/ETHNIC ORIGIN (MARK ONE)

- ☐ Native American or Alaskan Native
☐ Asian or Pacific Islander
☐ Black/African American (Not Hispanic)
☐ Hispanic/Latino (Puerto Rican)
☐ Hispanic/Latino (All other)
☐ White (Not Hispanic)

New York State Education Department

PHYSICIAN SURVEY

2006–2008

This questionnaire is a supplemental part of your
registration application. Complete and return it with
your registration form and fee.

Your responses will be maintained in a strictly
confidential manner by the Center for Health Workforce
Studies (chws.albany.edu) at the University at Albany,
SUNY. The responses will be analyzed and presented
only in aggregate form.

Item 2 asks for your NYS license number. This is clearly
indicated on the enclosed registration application.

Instructions

- Use a No. 2 pencil only.
- Make dark marks that completely fill the circle.
- Erase cleanly any answer you wish to change.
- Do not make any stray marks on this form.

APPENDIX B: DATA AND METHODS

APPENDIX B: DATA AND METHODS

1. File Descriptions

Five different data files were created from the survey response data. All of the tabulations in this report are of active patient care physicians (File E). Since File E was created by adjusting the other four files, each of the files is described below. State physician estimates for each of the files are presented in Figure 1.

A	Baseline Survey Response File (All Licensed Physicians)	66,843
	<i>Less Inactive and Retired Work Status (Q5) and less Blank Work Status with no Practice Location (Q10) and no Patient Care Hours (Q7)</i>	<u>-3,876</u>
B	Licensed Physicians Active in Medicine	62,967
	<i>Less Physicians with only out-of-state Practice Locations (Q10)</i>	<u>- 8,334</u>
C	Active Licensed Physicians in New York	54,633
	<i>Less licensed Residents (Q6)</i>	<u>- 1,181</u>
D	Active Licensed Physicians in New York, less Residents	53,452
	<i>Less no Patient Care Hours (Q7)</i>	<u>- 768</u>
E	Active Licensed Patient Care Physicians in New York	52,684
	<i>Adjust for non-response</i>	<u>x 1.2119*</u>
	Weighted Active Licensed Patient Care Physicians in New York	63,847

* $81,006/66,843 = 1.2119$

The weight was based on responses for the entire licensed physician population. In 2006 and 2007, there were approximately 81,006 physicians licensed in New York and the baseline response for the state was 66,843.

Figure B-1. Estimates of Physician Counts in New York, 2007

2. 2003 Active Patient Care Physicians in New York Estimates

The 2003 physician estimates used in the change in supply calculation were based on data from the 2002 and 2003 New York State Physician Licensure Re-registration Survey and were calculated analogously to the 2007 estimates. During 2002 and 2003 the survey had an estimated response rate of 76.6% (57,601 out of 75,236).

3. FTE Estimates

The FTE estimates were calculated as follows:

$$\text{FTE} = \text{Patient Care Hours} / 40$$
where Patient Care Hours (Q6) have been estimated by assigning a minimum and maximum value to each Patient Care Hours category (see below) and then making a random draw from a uniform distribution between these minimum and maximum points for each respondent.

<u>Hours/Week</u>	<u>Min.</u>	<u>Max.</u>
None	—	—
1 – 9	1	9
10 – 19	10	19
20 – 29	20	29
30 – 39	30	39
40 +	40	59

4. Upstate and Downstate New York Definition

In this report, downstate New York is comprised of all counties in the New York City and Long Island regions and Westchester County. All other counties are considered upstate New York.

5. Urban and Rural County Definition

Counties with populations of less than 200,000 are considered rural. This definition is part of “Eberts’ typology” and comes directly from state Public Health Law. For more information regarding this classification scheme, see: Eberts R. *Socioeconomic Trends in New York State: 1950-1990*. Albany, NY: New York State Legislative Commission on Rural Resources, September 1994.

Forty-three of the 62 counties in New York are considered rural by this definition:

Allegany	Hamilton	Schuyler
Cattaraugus	Herkimer	Seneca
Cayuga	Jefferson	St. Lawrence
Chautauqua	Lewis	Steuben
Chemung	Livingston	Sullivan
Chenango	Madison	Tioga
Clinton	Montgomery	Tompkins
Columbia	Ontario	Ulster
Cortland	Orleans	Warren
Delaware	Oswego	Washington
Essex	Otsego	Wayne
Franklin	Putman	Wyoming
Fulton	Rensselaer	Yates
Genesee	Schenectady	
Greene	Schoharie	

6. Principal Practice Setting Categories

Solo	Solo Practice
Group	Physician Partnership Group Practice-Owner/Operator Group Practice-Employee/Staff
Hospital	Hospital-Inpatient Hospital-OPD (Outpatient department) Hospital-Satellite Hospital-Emergency Room
Other	Free-Standing Health Center or Clinic (Diagnostic and Treatment Center) Staff Model HMO Nursing Home Home Health State or Local Health Dept. Other Setting

7. Important Notes

Due to the periodicity of the registration process in New York, the data reported here should not be viewed as a snapshot in time of the current physician workforce. Rather, they should be seen as a general picture of the physician workforce during the years 2006 and 2007. For convenience, however, the numbers and tabulations reported reference the year 2007. It also must be emphasized that the data presented in this report are estimates and are subject to a certain degree of error, especially in the case of rare events, small populations, and missing data. Finally, due to confidentiality agreements, cells with counts below five are indicated as "--" throughout the report.

The principal practice location zip code was used to place individuals within a county. However, in some instances, zip codes overlap county boundaries. As a result, care should be taken when interpreting the estimates.

8. Other Data Sources

Both *Percent in Poverty 2005* and *Median Income 2005* in the selected population characteristics table were obtained from the U.S. Census Bureau, Small Area Income and Poverty Estimates (SAIPE). These data were retrieved on October 27, 2008 from <http://www.census.gov/hhes/www/saipe/index.html>.

The population, race and ethnicity, and age data in the selected population characteristics table were obtained from the New York State Department of Health, Information Systems and Health Statistics Group, Bureau of Biometrics and Health Statistics, Claritas (Small Area) Data. These data were retrieved on October 21, 2008 from the Bureau of Biometrics and Health Statistics intranet at <http://biometrics/pops/claritas.htm>.

The information in the health status indicators table were obtained from the New York State Department of Health, New York State County Health Indicator Profiles. These data were retrieved on October 21, 2008 from <http://www.health.state.ny.us/statistics/chip/index.htm>.

Population estimates used to estimate the 2003 rates for the change in supply estimates were obtained from the U.S. Census.

APPENDIX C: COUNTY SUMMARY
